Introduction to MDL

> Let's learn about Google's design framework MDL!

What is Material Design?

- [About Material Design](#)
- [Color System of Material Design](#)
- [Example1](#)
- [Example2](#)

Examples of real websites that used MDL

- [www.android.com](#)
- [stamplay.com](#)

Starting with MDL

To use MDL, we need to add the CSS and Javascript link. You can find them on the below link.
[Getting Started with MDL](#)

You can customize the primary and accent colors of your web page.
[Customizing Colors](#)

Using MDL Components

You can look for and use MDL components at [getmdl.io](#).
Try using different types and colors of components.

Using MDL Icons

You might have noticed that we have included material icons link in the `<head>` of our HTML code.
This is for using icons in our page.
You can check how to use them in [Material Icons Guide page](#).
You can check the list of icons [material.io/tools/icons](#).

Now let's try using MDL with HTML and CSS we learned to build our own web pages!
